

## MOBILE WORKSHOP

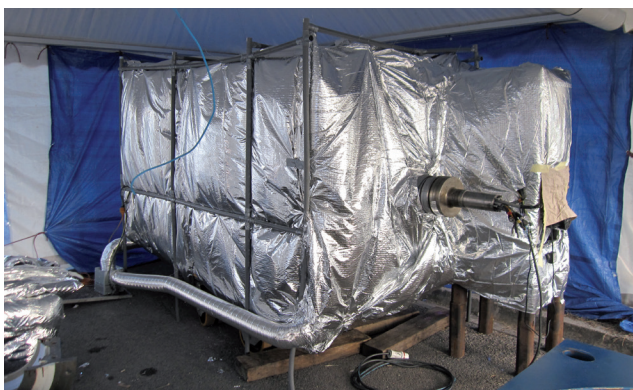

### ON-SITE MAINTENANCE AND REPAIR

#### “FACTORY QUALITY” REMANUFACTURING SERVICE ON YOUR SITE

The service and maintenance of alternators is submitted to many constraints that are often related to the configuration of the sites where they are installed: difficult access, remote location, dismantling difficulties, cost and transport time, ... In order to offer you a better service, we have designed a mobile workshop equipped with the best tools and technologies to carry out all remanufacturing operations.

**With this system, you save on transportation costs,  
and downtime is reduced by up to 90%\***

#### CARE2GEN BENEFITS

Creation of a steaming station

One workshop for all the restoration stages of your alternator  
(washing, steaming, varnishing, ...)

Creation of a washing station

Fully equipped workshop: ramp, lifting bridges, workbenches,  
special extraction tools, ...

\* Example case of a 3 months downtime (transport + administrative operations) for an effective 12 days intervention on the machine.

## OUR CARE2GEN OFFER
