

# SWITCH2D350

## NEW REGULATOR KIT

Your alternator is equipped with an analog regulator R448, R438 or R450, then our new **SWITCH2D350** regulator kit is for you!  
 The **SWITCH2D350** is an all-in-one kit that allows you to quickly replace an analog regulator by the D350 digital regulator.

### Our ready-to-use solution!

#### • INCLUDED

- D350 regulator
- Set of cables converting Faston to MATE-N-LOK
- Secondary set of cables to connect the Current Transformer
- Bag of lugs of various sizes
- NFlink™ programming module
- Installation manual

#### • ADVANTAGES

This kit avoids wiring mistakes, the use of specific tools and divides the regulator installation duration by two.

It also allows to be technologically up-to-date, to improve voltage regulation performances and to comply with all new safety standards.

Nidec Power accompanies you during the retrofit of your AVR via our video.
