

## Electrical Power Generation – Regulators D700 Firmware Application Update

You are currently using a 1.1.140 Application Firmware on D700.

In a continuous improvement of our products, we announce the update of Application Version in D700 product.

In this new version 1.2.31, you will find these new features:

- Add PSS function.
- Add new Webserver interface.
- Add new default detection (I stator, kW, kVAr, kVA, I2t)
- Add SD from ethernet
- Upgrade of Event logger
- Update database

But also, some improvements:

- Optimize FFT measurement.
- Optimize Pole slipping function.
- Optimize Ethernet interface.
- Optimize Synchronizer.

This new firmware can be uploaded directly to your D700 by using the EasyReg Advanced application. Please contact technical support at [service.epg@leroy-somer.com](mailto:service.epg@leroy-somer.com) for further information.
