

## Electrical Power Generation – Regulators D550 Firmware Application Update

Dear customers,

You are currently using a 1.2 (b15) Application Firmware on D550.

In a continuous improvement of our products, we announce the update of Application Version in D550 product.

In this new version 1.2 (b17), you will find these new features:

- Correction the automatic memorization of CAN writing value on the D550 EEPROM could lock the CAN communication

This new firmware can be uploaded directly to your D550 by using the EasyReg Advanced application. Please contact technical support for further information.
