

## Electrical Power Generation – Regulators D350 Firmware Application Update

Dear customers,

You are currently using a 1.1 (b24) Application Firmware on D350.

In a continuous improvement of our products, we announce the update of Application Version in D350 product.

In this new version 1.2 (b0), you will find these new features:

- Occasional authorization of 95% PWM start-up, required for a specific case of start-up under load.
- Improved fault detection (phase rotation direction, timed PT100 open/short management), harmonized with other platform (D550).
